

Joshua Michael Lennon

AI Engineer | Machine Learning | Agentic AI | NLP | Computer Vision

Surrey, UK | joshlennon71@gmail.com | GitHub: <https://github.com/awkwardapples> |

Portfolio: <https://joshlennon.com/>

Professional Summary

Artificial Intelligence graduate with a First-Class dissertation (76%) and current MSc student. Experience across machine learning, NLP, computer vision, software engineering and cloud consulting through startup. Built production-oriented SaaS software and conducted independent AI research including deep learning, neural networks from first principles and visual computing.

Education

University of Manchester – BSc Artificial Intelligence (2021–2025)

Key modules: Machine Learning, Data Science, Visual Computing, Database Systems.

Dissertation: Extracting Magnetic Image Data (76%).

University of Surrey – MSc Artificial Intelligence (2026–2027).

Key modules: ML, AI & Health, AI & Sustainability

Technical Skills

Python, Java, C++, JavaScript, SQL, HTML/CSS, React

Machine Learning, Deep Learning, NLP, Computer Vision, Data Science, PyTorch, OpenCV, Pandas, NumPy, Matplotlib

Git/GitHub, PostgreSQL, Remix, Stripe Connect, Cloudflare R2, Software Engineering, OOP

Projects

Gen AI Agentic risk assessment hackathon

Developed a full-stack, rapid demo using Node.js with React and RESTful APIs, integrating OpenAI API for LLM reasoning to deliver an agentic AI solution that retrieved data using RAG pipelines. Presented in a consulting style investors pitch to genAI experts in London and later inspired my entry to the open agent 2026 hackathon.

Full stack e-commerce SaaS platform startup:

Building scalable music e-commerce SaaS using Remix, PostgreSQL, Stripe Connect and Cloudflare R2 with dashboards and SEO for secure, automated beat sales and delivery.

Deep Learning Research

Year-long study covering supervised, unsupervised, reinforcement learning and generative models to design and implement machine learning models with real-world applications.

NLP Classification

Built supervised news classifier using Pandas and Matplotlib.

Visual Computing Dissertation

Developed image-processing application for magnetic field research; dissertation awarded 76%.

Software Engineering

Year-long Git/GitHub Java team project maintaining large codebase.

Work Experience

Competitive workplace course at London Heathrow granting high responsibility access to privileged areas such as runways, Air Traffic control and sensitive security operations.

Cooperating with large groups of people and presenting to large corporate audiences including a chief commercial officer.

Research & Achievements

- AI ethics research presented at conferences.
- Quantum computing research presentation.
- European Patent Office certification.
- Duke of Edinburgh Award.
